

# Deployment & Access Instructions

## 1. System Access

The deployed system is publicly accessible and does not require any special permissions or login for access.

The MyDiet web application is fully deployed and accessible online. Users and markers can access the system through the following URL:

🔗 <https://comp208-group47-mydiet.netlify.app>

No installation is required. The system can be accessed directly using a web browser.

---

## 2. System Requirements

To run the application, users need:

- A stable internet connection
  - A modern web browser (e.g., Google Chrome, Microsoft Edge, Safari)
  - A device such as a laptop, desktop, or tablet
- 

## 3. How to Use the System

1. Open a web browser
2. Enter the URL provided above
3. Sign up for a new account or log in with existing credentials
4. Navigate through the system using the menu:
  - Homepage
  - Plan
  - Identifier
  - Community

The system is fully functional online and does not require any additional setup.

---

## 4. Source Code Access

The full source code of the project is available at:

<https://github.com/2026-COMP208-GROUP47/MyDiet.git>

The repository includes:

- Front-end code
  - Back-end
  - Documentation and configuration files
- 

## 5. Running the System Locally

System Requirements:

- Node.js (version 18 or higher)
- npm (version 9 or higher)
- Java (JDK 17 or higher)

To run the project locally:

1. Clone the repository:

```
git clone https://github.com/2026-COMP208-GROUP47/MyDiet.git
```

2. Install dependencies:

```
npm install
```

3. Start the development server:

```
npm run dev
```

4. Open the local server link (usually <http://localhost:5173>)

5. To run the full system, the backend server (Spring Boot) and database (MySQL) must also be properly configured and running.

---

## 6. Deployment Information

The system is deployed using **Netlify**, which ensures:

- Continuous availability
- Stable hosting
- Fast global access

The deployed version reflects the latest stable version of the application.
